Appendix B Electrophorsis of ‘P25’ (A), ‘P20’ (B) and ‘P23’ (C) PCR amplified products. M: DL 2000 marker (from bottom to top:100, 250, 500, 750, 1000 and 2000bp); 1: PCR products.

Appendix C. Electrophoresis of RT-PCR and nested PCR products. M: DL2000 marker

Appendix D Electrophoresis results of restriction enzyme digested products of the plasmids generated in this study using *Sac* I and *Bam* HI. m: DL2000 marker; M: DL15000 marker (from bottom to top: 100, 250, 500, 750, 1000, 2000, 2500, 5000, 7500, 10000 and 15000bp); 1-6: double digestion identification of pTZ57R-hp23, pTZ57R-hp25, pTZ57R-hp20, pCAMBIA2301G, pCAMBIA2301G-hp20, and pCAMBIA2301G-hp25.
