

Appendix Bacterial composition of the nine treated soil samples at the phylum level. Treatments included 0 (control), 5, 10, 20, 50 times quantities of residual coating from conventional application amount of resin (R5, R10, R20, R50) and water-soluble (W5, W10, W20, W50) coated CRFs.

Phylum	Control	R5	R10	R20	R50	W5	W10	W20	W50

Averages of three replicates with standard deviations in parenthesis

Significant differences (ANOVA, $p<0.05$, LSD test) are denoted with different letters.
