

Appendix D Partial separation of primers for electrophoretic detection. (A) Chromosome D01 contains D01INDEL58.27, D01INDEL58.54, and D01INDEL61.45, and also appeared to have partial separation; (B) Chromosome D09 contains D09INDEL31.45, D09INDEL43.06, D09INDEL44.74, and also appeared to have partial separation; (C) We screened primers that were biased between the two parents for further fine positioning, and the black box was shown.
