Zygomycota	<i>Mortierella</i>	13.69±4.23	15.24±0.31	21.18±3.31	0.151

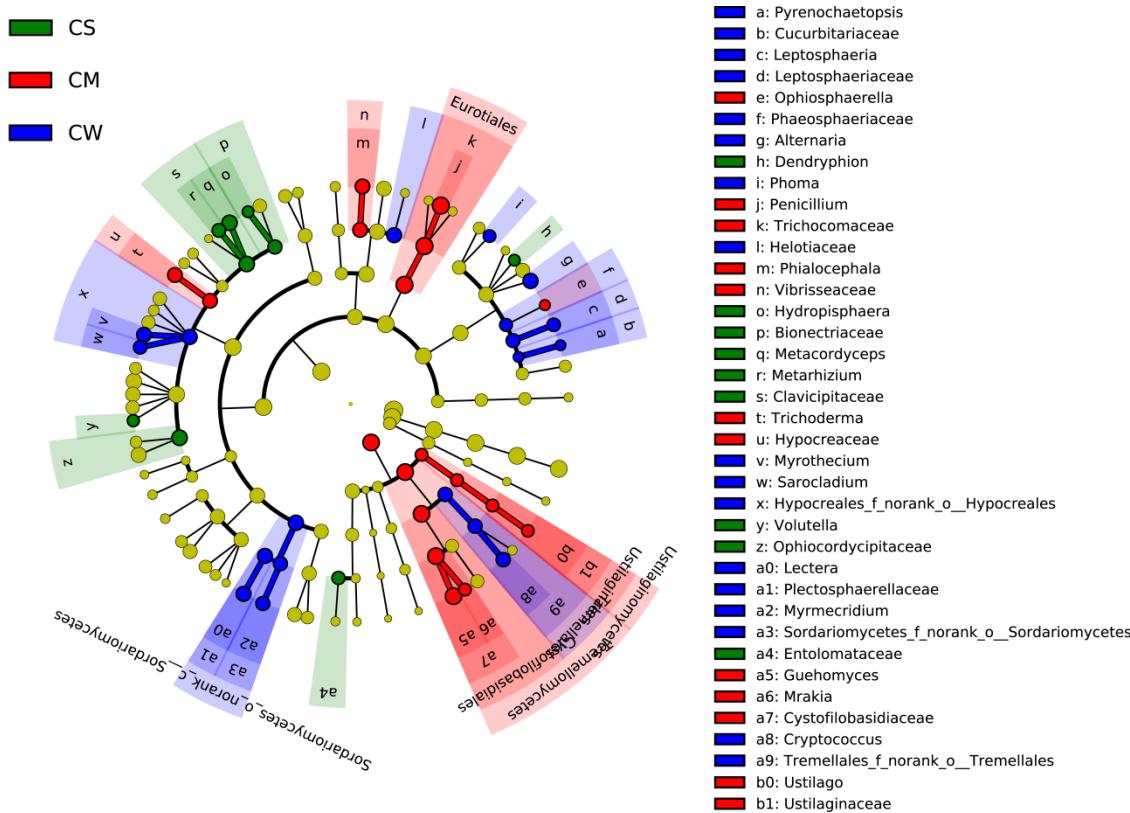

Means ± standard deviation by ANOVA (p < 0.05).

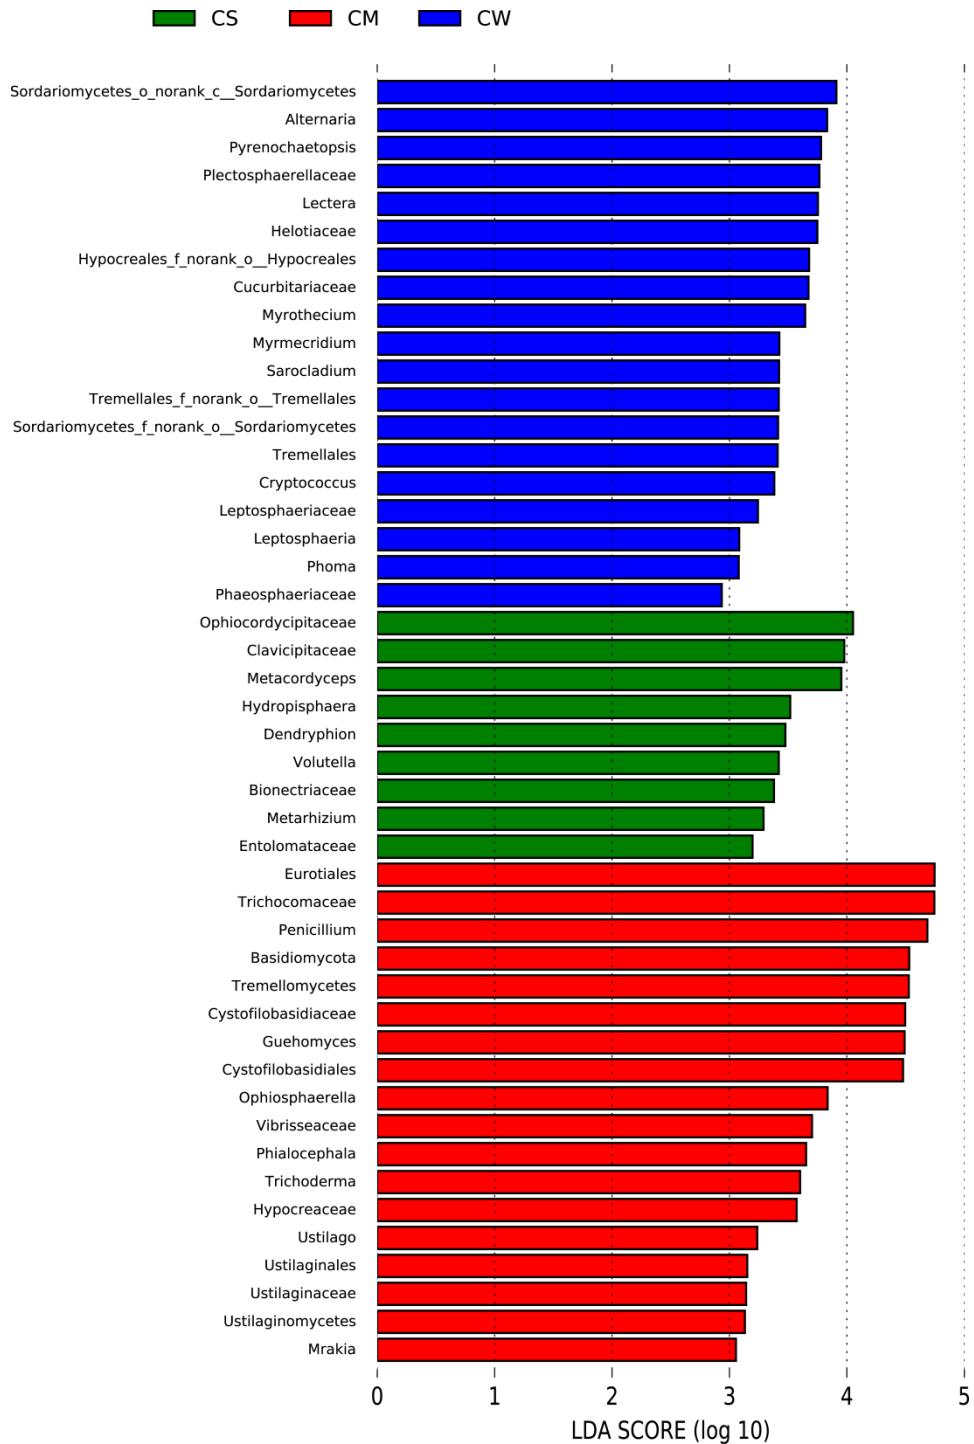

Appendix D Taxonomic cladogram produced from LEfSe analysis. The phylum, class, order, family, and genus levels are listed in order from inside to outside of the cladogram and the labels for levels of family and genus are abbreviated by a single letter. Green, red and blue showed taxa enriched in RS, RM and RW, respectively, whereas the yellow circles represented the taxa with no significant differences among three cropping systems.

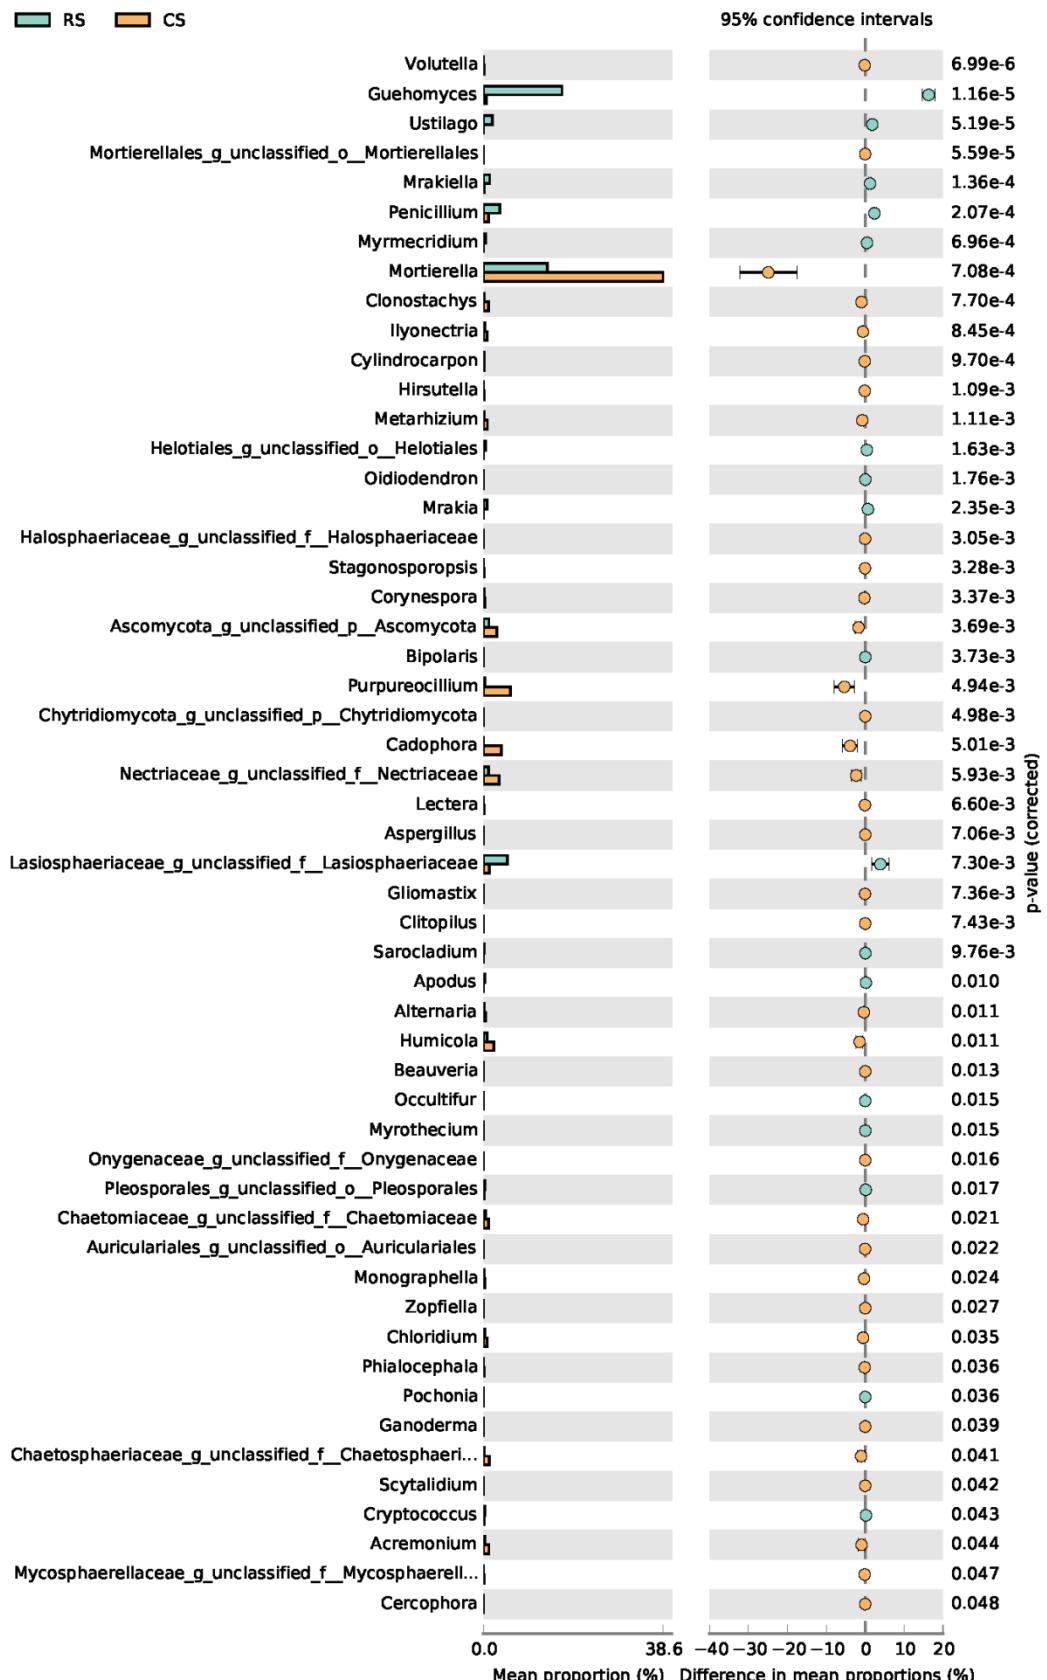

Appendix E Histogram of the linear discriminant analysis (LDA) scores. Taxa enriched in RS are shown in green with a positive LDA score, RM in red with positive LDA score and RW in blue with a positive LDA score.

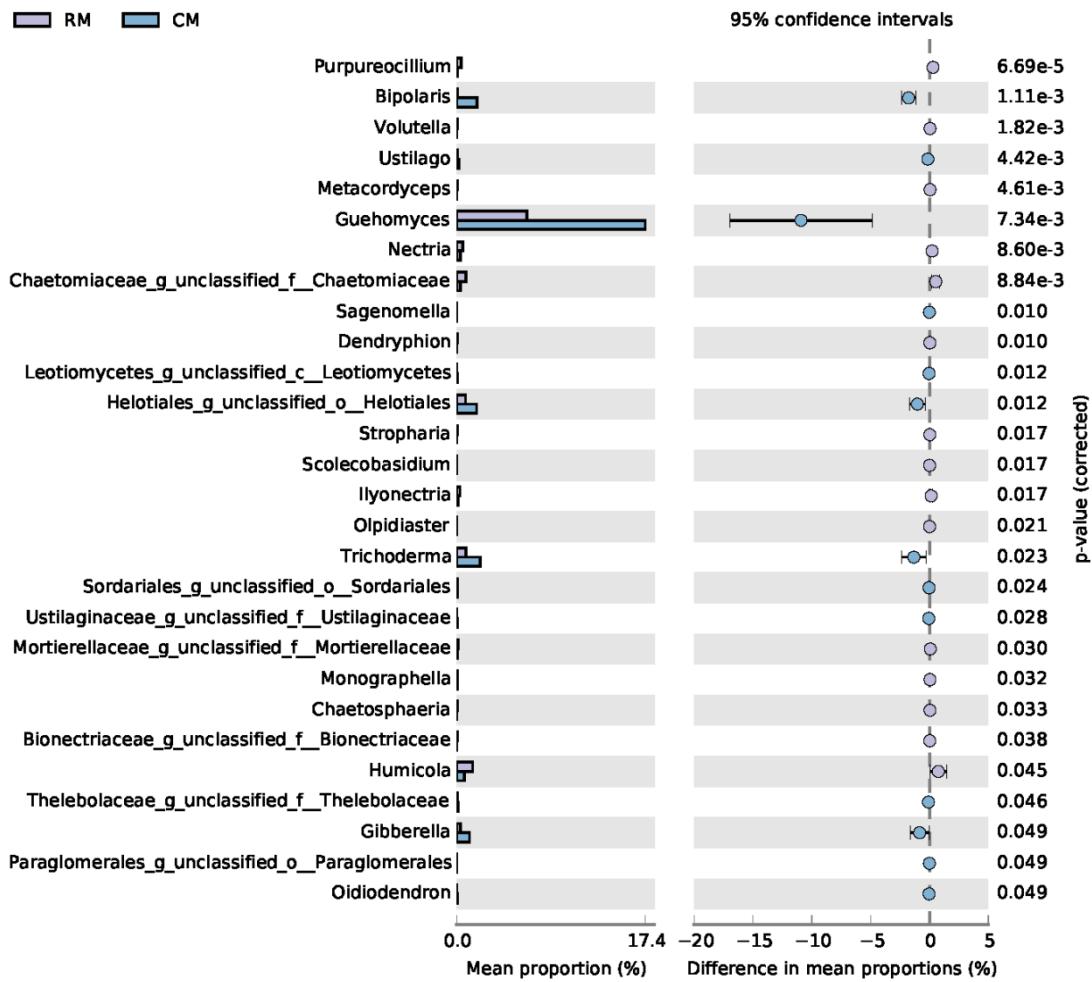

Appendix F Taxonomic cladogram produced from LEfSe analysis. The phylum, class, order, family, and genus levels are listed in order from inside to outside of the cladogram and the labels for levels of family and genus are abbreviated by a single letter. Green, red and blue showed taxa enriched in CS, CM and CW, respectively, whereas the yellow circles represented the taxa with no significant differences among three cropping systems.

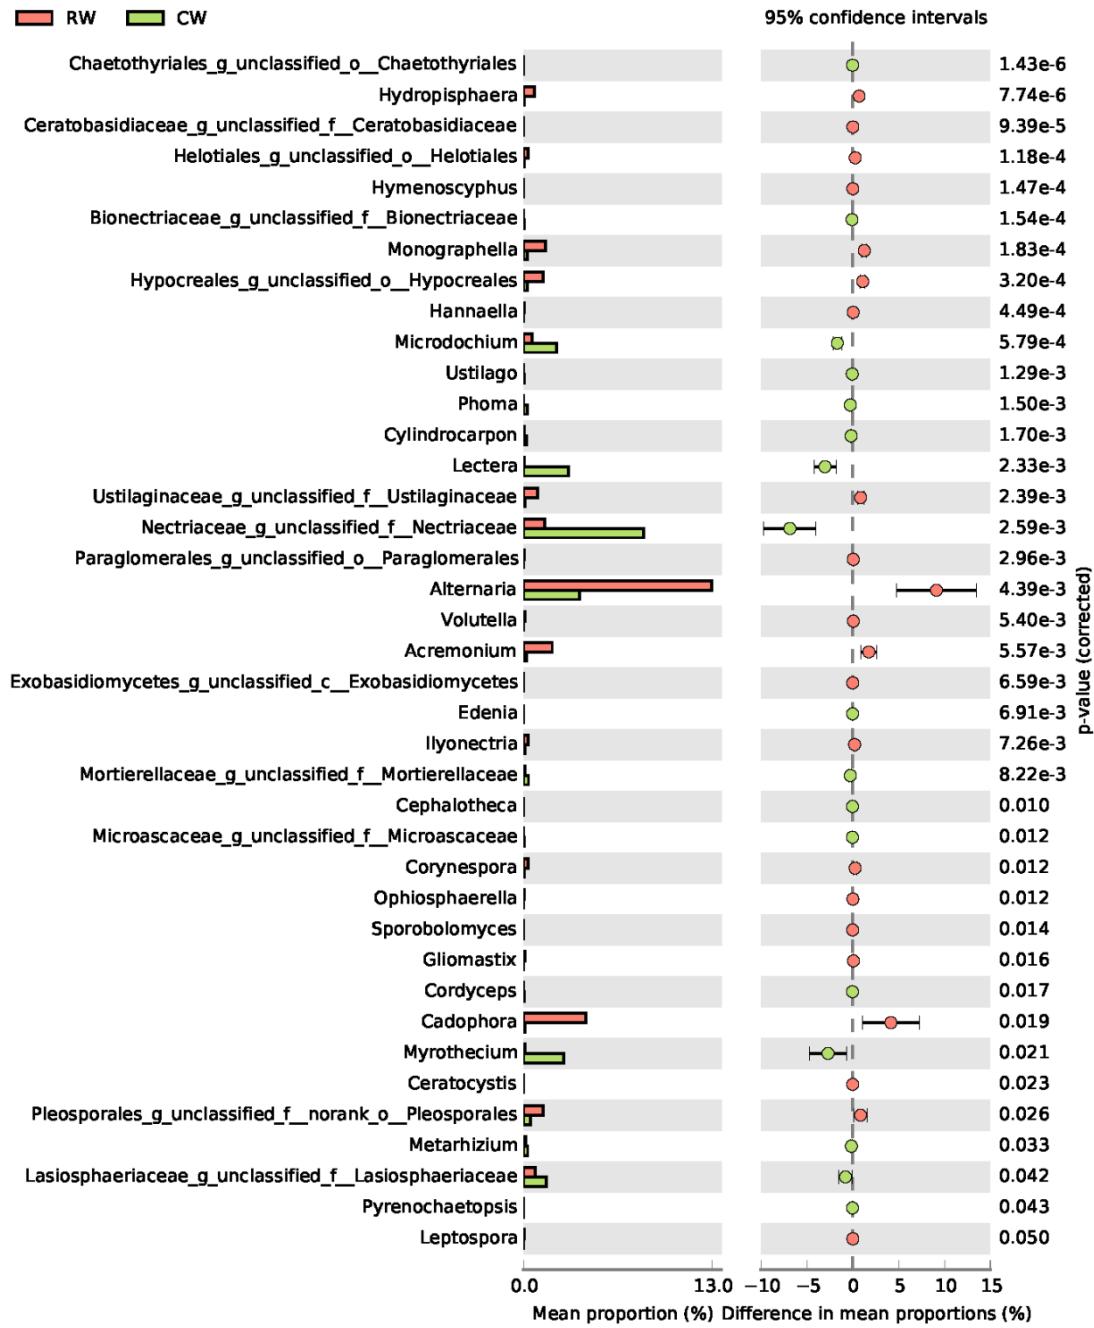

Appendix G Histogram of the linear discriminant analysis (LDA) scores. Taxa enriched in CS are shown in green with a positive LDA score, CM in red with positive LDA score and CW in blue with a positive LDA score.

Appendix H The variance of relative abundance of fungal genera in response to CS compared with RS at 95% confidence intervals.

Appendix I The variance of relative abundance of fungal genera in response to CM compared with RM at 95% confidence intervals.

Appendix J The variance of relative abundance of fungal genera in response to CW compared with RW at 95% confidence intervals.

Appendix K List of abbreviations

Soybean rotation	RS
Maize rotation	RM
Wheat rotation	RW
Long-term continuous soybean cropping	CS
Long-term continuous maize cropping	CM
Long-term continuous wheat cropping	CW
Quantitative real-time PCR	qPCR
Operational taxonomic units	OTUs
Principal coordinate analysis	PCoA
The similarity percentage analysis	SIMPER
Linear discriminant analysis	LDA
linear discriminant analysis effect size	LEfSe
