Fig. S1

The diagram shows the percentage of genes categorized under different functional domains. The categories include:
- No Homology to Known Proteins
- Unclassified
- Metabolism
- Cell Structure
- Transcription
- Protein Destination & Storage
- Disease & Defence
- Signal Transduction
- Transporter
- Protein Synthesis
- Intracellular Traffic
- Energy
- Pre-Transcription
- Cell Growth & Division
- Secondary Metabolism
- Transposon

Different colors represent different datasets: Huipizhiheidou, Wuzhaiheidou, Lee, and Essex.
