

Appendix B. Expression levels of the target gene in transgenic lines with *TaNF-YB11* overexpression

WT, wild type; Sen 1 to Sen 6, transgenic lines with *TaNF-YB11* overexpression. Data are shown by average from triplicate results plus standard error. The expression values were normalized by *Tatubulin*, a constitutive gene in *T. aestivum* species whose expression level was set as 1. Sen 1 and Sen 2, transgenic lines with *TaNF-YB11* overexpression. Anti 1 and Anti 2, transgenic lines with *TaNF-YB11* knockdown expression
